It'll create little harmful carbon dioxide to the air as trains and cars do. What's more, it is wise to use a bicycle in rush hour when cars are desperately waiting in heavy traffic jams. Also, I could benefit a lot from learning from him, such as the way he arranges his notes and how to use software to make statistic analysis. Still, he sets a good example for me to follow. And, because of its location, He fei has abundant seafood, especially lobsters and sleeve-fish, which are very delicious when fried with traditional Chinese seasonings.

12. Restaurant(“学生之家”饭店)

I would like to recommend a small restaurant named STUDENTS' HOME near my college. It is quite attractive to me and my classmates.

First of all, the food there is quite delicious. The cook is very good at preparing food which is not only good to look at but even better to taste.

Besides, the prices there are reasonable. Fried eggs with tomatoes is 4 Yuan. Steamed pork with peanuts is 7 Yuan. Sometimes it costs even less than the dishes in school's mess hall!

Still, the waitress there is kind and warm-hearted to us. We could enjoy a comfortable and cozy atmosphere there. I really love this little place! (116)

<<The lost>> is a very interesting book about an old legend of France; this book is also very popular among my classmates. By reading it, I not only broadened my horizon not also learnt quite a lot about the Bible, western religion, Paris museums, and French history. In this book, in order to protect the secret of her family, the girl name Emily experienced lots of difficulties and accomplished countless impossible missions. The whole story developed in a very logical and fascinating way. It even made me dream of experiencing the whole story by myself! I really love it! (99)

17. People who influences me most(医生舅妈)

I'll say it is my aunt who influences me the most. She is a pediatrician of the Children's hospital in our city. She almost devotes all her time helping those little patients who are 6 to 10 years old. Once, a little boy refused to accept a very urgent operation just because of fear, his parents made desperate efforts but all failed. Then my aunt stepped into his room and chatted with him throughout the whole night, and the next day, he agreed. Nobody knew how she did this but everybody knew that she saved one more child again. Actually many sports are very popular in China, such as soccer, volleyball, table tennis, and badminton. Among those games, I think it is table tennis, which deserves the title of "most popular".

I think table tennis should deserve the title of "most popular".

My friend Robby told me that when he was in America, the deepest impression he has on China is concerning to martial art, Chinese food and table tennis. It is not amazing to see a couple of primary

school children playing Ping-Pong by a table which is nearly as tall as they are! Because of this kind of popularity and fancy among different age groups, there are always plenty of outstanding ping-pong athletes surging into the National Team. And, as a result, we've got nearly all the championship of table tennis around the world. (109)

19 Happiest / unforgettable moments (克服困难,竞选成功)

My happiest moment is overcoming a difficulty in a competition for the student body president two years ago. On that day, I have to give an election speech in front of 1500 people. My voice couldn't help trembling and my palms kept sweating. I thought I would blow it for sure. But, suddenly something came up to my mind. I remembered how many posters with my slogan I had released and how much encouragement I've got from my friends and teachers. With that, all my confidence and courage reappeared again! At last I gave a very successful speech and won the competition with flying colors! That really made my day! (111)

20 A difficulty I overcame (竞选演讲紧张)

It should be a competition for the student body president of my university. On that day, I have to give an election speech in front of 1500 people. I was so nervous that my voice couldn't help trembling and my palms kept sweating. I thought I would blow it for sure. But, suddenly something came up to my mind. I remembered how many posters with my slogan I had released and how much encouragement I've got from my friends and my teachers. With that, all my confidence and courage reappeared again! At last I gave a very successful speech and won the competition with flying colors! (106)

21 Features of cafe or restaurant I like (味道,价格,态度)

I would like to choose a restaurant with the following characteristics.

First of all, the food there must be quite delicious; at least as appetizing as the food made by my father. It'll be much better if it is also clean and good looking.

Besides, the prices should be reasonable. For example, Fried eggs with tomatoes, no more than 6 Yuan and steamed pork with peanuts no more than 10 Yuan would be Ok!

I also care about the waiters and waitress' attitudes towards consumers. If they are kind and warm-hearted, I will probably enjoy a comfortable and cozy atmosphere there. But, if not, I would better leave and choose another one. (110)

22. Most efficient transportation in your country. (汽车效率最高)

Well, my answer is bus service.

First of all, you can find a bus stop out of your companies or universities without any difficulty, because the distance between two bus stops is usually no more than 200 meters.

In addition, thanks to the improved road condition, a bus can easily run at the speed of 150 km/h on freeways. For example you can travel by bus from Shanghai to Nanjing in less than 3 hours.

Sometimes you can even make some friends with certain passengers, because you always get on the same bus at the same time from the same stop. It's of great fun, isn't it? (108)

23. Sport (篮球)

Basketball is my favorite sport.

Because playing basketball **offers** me a chance of **taking some physical exercises which is essential** in the **maintenance of physical fitness as well as high spirits**.

It also **enables** me to **keep in touch with my friends**, because we are usually **busy with different stuff** and have less and **less time to communicate and share happiness** with each other. This is a pretty good way!

It also **strengthens my sense of sharing and team-spirit**; because we have to cooperate with one another and **fight as a team to bear victories or failures**. I've learnt quite a lot from it. (103)
